Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 25-32, 40-42, drawn to a method of polishing with ammonium persulfate, classified in class 216, subclass 88.
- II. Claims 9-16, drawn to a method of polishing with periodic acid, classified in class 216, subclass 88.
- III. Claims 17-24 and 43-47, drawn to a method of polishing with HDA, classified in class 126, subclass 88.
- IV. Claims 33-39, drawn to a method of polishing with peracetic acid, classified in class 216, subclass 88.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation because they use different etchants.

Because these inventions are distinct for the reasons given above and the search required for any Group I-IV is not required for the other of Groups I-IV, restriction for examination purposes as indicated is proper.

A telephone call was made to Jim McDonald on July 11, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Paper No. 5
Art Unit: 1765

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
